Perennia Innovation Centre grows your business

Perennia Innovation Centre

You need to start somewhere. And, this is a great place to start.

The Perennia Innovation Centre helps producers, processors and new food entrepreneurs create a new food or nutraceutical products, or improve current products or processes. It also offers food producers access to pilot scale equipment that may be cost prohibitive for them to purchase on their own, and has a number of incubation suites for food and bio-related start-ups requiring incubation space and technical support.

Perennia Food and Agriculture's mission is to help farmers, fishers and food processors be prosperous and profitable.

Perennia's services are grouped under three major areas: field services, quality and food safety and product development and commercialization.

Our staff is trained to assist in areas such as: new product development, product and process improvement, packaging options, nutritional analysis, shelf-life determination, food safety program development and international food safety scheme certifications.

Our facilities include: microbial, analytical and product development labs, as well as a pilot plant for small scale processing and incubation suites for start-up food and bio-related companies.

Perennia has a team of more than 30 specialists covering most aspects of food production from source to consumer. Please visit www.perennia.ca for more information.
