

Join the team making real GROWTH HAPPEN

Perennia Food and Agriculture Corporation is Nova Scotia's development agency focusing on the food sector. Our mission is to support success, transformation and economic development in Nova Scotia's agriculture, seafood and food and beverage sectors. That means our team of bright, engaged specialists are always learning, always evolving, and always ready to take on a new challenge. **So, what are you waiting for? Come Grow with us.**

Senior Full Stack Developer

Working as part of a small web-based software development team (2 people at present) and in close contact with our marketing team including a graphic designer, and our special projects team, this position is vital to the success of Perennia's products and services available to Nova Scotia's agriculture, seafood and food processing industries.

As a small but mighty crown corporation, we need someone to develop new online website portals and applications and support the redesign, refinement and continuous improvement of the following current products with the end user in mind:

- Farm Data Tools (www.farmdatatools.perennia.ca)
- Perennia Academy (www.academy.perennia.ca)
- Coast to Classroom (coasttclassroom.ca)
- The Canadian Atlantic Shellfish Health Network (www.cashnhub.ca)
- an internal client information and metric tracking online database
- support for our website which is going through a major overhaul (www.perennia.ca)

This position is remote. Hours are 8:00 a.m. to 4:30 p.m., Monday to Friday with work on evenings and weekends if there are issues related to client access to our products or services/trouble shooting.

This is an exciting opportunity for professionals with expertise in front and back-end development to have a meaningful impact on the sustainability and competitiveness of the Nova Scotia's agricultural sector by having tools that deliver information and data so food producers can make better business decisions.

If you have a curious mindset, take ownership of your work naturally, listen and ask questions to fully appreciate and understand needs, and want to develop and deploy wonderful and helpful products, we welcome your application.

Consultants with experience in this field are also welcome to send an inquiry if they are interested in being contracted for this opportunity and not be a Perennia employee.

What you'll do

- Develop, test and maintain internal and client-facing full stack solutions that are clean and scalable and meet both technical and business requirements
- Work on existing code as well as developing back-end and front-end integration with databases and to optimize data flow
- Support global payment deployment in a web environment
- Build front end applications based on branded designs created in collaboration with the marketing team and take the external and internal and end user into account
- Collaborate with all teams at Perennia as required to design, define and deploy new features
- Develop back-end systems using Node.js, Php, Python, .Net and
- Be committed to finding simple solutions to complex problems where possible
- Work closely with Perennia specialists, producers, commodity organizations, researchers, and government partners to ensure that cost of production data supports farm business management, industry planning, policy development, and informed government decision-making.

What's needed

The ideal candidate will have strong programming skills, an attention to detail and quality coding, experience working with current web-based programming technologies and team-oriented focus working with their other colleagues at Perennia.

Specifically, we are looking for someone with:

- A degree in computer science, software engineering or related
- At least six years of relevant experience
- Experience in REACT JS, HTML5, CSS3, C#, ASP.NET, Typescript, JavaScript, jQuery, REST API
- Experience with code management reviews, repositories and code merge processes such as GitHub and Jira
- Familiarity with modern frameworks and technologies such as React, Angular, Node.js,

- Experience in integrating applications with cloud platforms, particularly AWS
- A keen understanding of the AWS environment
- Strong understanding of the software development cycle
- Strong analytical and problem-solving skills to determine solutions using available technologies
- A collaborative working style
- A detail orientated professional who can bring collaboration and innovation to the project team with a keen ability to understand how their work fits into the business goals and operations of the corporation
- Excellent oral and written communication skills
